

# A Checklist for Making a Winning Trade

**Just remember these 5 rules before making a trade**

## Emotions

*Make sure you're calm and confident. Any strong emotions prevent you from getting good trading results.*

## Strategy

*You should clearly understand what a trading signal looks like and open a trade only after you have received it.*

## Money Management

*The trade amount must not exceed the daily limit, which you have set in advance.*

## Trend

*Take a close look at the chart and determine long-term and short-term trends for making a trade.*

## Time

*Once again, think whether you choose the right time to make a trade.*
